## Contents

**aboutwilson** (2) simple, nice looking, teaser followed by category and tags list, navigation footer.

**notmyidea** (0) default, nice looking, shows entire article on main index, gives categories in a header bar.

**alchemy** (2) nice looking, simple style, shows heads of 5 articles on main index, no category bar.

**backdrop** (0) fails CRITICAL: `UndefinedError: 'articles_paginator' is undefined`

**basic** (1) looks okay, content all on LHS of screen, teaser, no categories/tags

**bluegrasshopper** (1) thin strip of content, no yeaser, highly styled, bad font scaling

**blue-penguin** (2) not blue, clean, white, full articles on main page, link to "Archive", no category bar, no teasers.

**bold** (0) fails CRITICAL: `TypeError: expected string or buffer`

**bootlex** (1) looks nice, teasers on main page, links in RHS sidebar, tags but no categories. Would needs translating to en and some fine-tuning of text (eg, removal of "Blog" title).

**brownstone** (2) main+teaser layout, nice but too stylish for me

**BT3-Flat** (0) picture-scroll-reveal style. Looks like a damn startup company page.

**buildtexts** (2) last+teaser layout

```
burrito (0) failed =CRITICAL: TemplateSyntaxError: Encountered un-
known tag 'assets'=
```

**chunk** (2) lots of unused space. no distinction between links and categories

**crowsfoot** (2) unused space, but zoomable, teasers, images okay

**foundation-default-colours** (2) looks good, teaser indices, no archive, side bar

franticworld (0) too stylish

## html5-dopetrope (0)

**irfan** (0) failed

```
iris (1) looks nice but more for text, not great text rendering, long code
      lines don't wrap
```

jesuislibre (0)

lazystrap (0) failed

**lightweight** (2) looks nice, no tags, teaser indices, needs translations, background needs work

**lovers** (1) too bloggy, resizes dumbly

**maggner-pelican** (0) fails

**martin-pelican** (1) styled for mobile

**martyalchin** (1) somewhat broken, looks nice, not much navigation

**mg** (2) okay, looks like some MicroSoft-world blog, fonts are hard on the eyes

**mnmlist** (1) too much so

**monospace** (2) is what it claims to be, not enough differentiation between text and code, bad placements of nav

**neat** (1) no styling

**nest** (1) okay, gigantic header, but no nav

**new-bootstrap** (2) three column index with teasers, bad scaling

**nikhil-theme** (2) date-teaser columns for index, no archive/category nav,  
broken tag/category links

**niu-x2** (0) failed

**nmnmlist** (1) too much so, just darker

**notebook** (1) chokes on pre-heading text

**Nuja** (2) full-article indices, wasted space

**pelican-cait** (1) wasted side space

**pelican-simplgrey** (2) bad scaling

**plumage** (2) bad nav, good scaling, teaser indices, scrolling code,

**pujanga** (0) some script freaks firefox

**pure** (0) wasted side space

**relapse** (0) meh

**Responsive-Pelican** (2) it's okay. not sure what's "responsive" about it

**voidy-bootstrap** (2) nav bad, wasted header

**waterspill-en** (1) cute, but too stylish
